SNAP-ON EQUIPMENT NOMINATED AFTERMARKET EQUIPMENT SUPPLIER OF THE YEAR

Snap-on Equipment is delighted to have been nominated Aftermarket Equipment Supplier of the Year in the NTDA Tyre & Fast Fit Awards. The nomination reflects Snap-on Equipment's long-standing position as a market leading garage equipment manufacturer, supplier and service provider. Recent innovations, such as the John Bean V3D Lite, the new easy-to-use wheel alignment system and the Hofmann monty™ 3300 racing, Europe's best selling performance tyre changer, are set to maintain the company's focus on making the latest technology accessible to all workshops in the wheel service market.

Snap-on Equipment is a fully owned subsidiary of Snap-on Corporation and was formed in 1997, following the merger of Hofmann and John Bean (formerly Balco), both well known names in the garage equipment industry. The company designs, manufactures and markets an extensive range of equipment for car and commercial vehicle service. Products under the Hofmann, John Bean and Cartec brands include brake and suspension testers, chassis dynamometers, tyre changers, wheel balancers and wheel aligners, emission analysers, vehicle lifts, MOT bays and headlight adjustment equipment. Customers are supported through comprehensive in-house service, training and financing operations.
